

Climate Day: Nexans organizes the fourth edition of its summit in Morocco

PRESS RELEASE

- The 4th edition of the Group's annual Climate Day will focus on the theme: "Sustainable Electrification for the Energy Transition: A Major Opportunity for Africa."
- This event will bring together key stakeholders from the energy sector, including institutions and economic players, with significant participation from African countries.
- A unique opportunity to engage in high-level discussions and to showcase concrete solutions for climate challenges in the region.

Casablanca, September 10, 2024: Nexans, a leader in the design and manufacture of cable systems and services, is organizing the 4th edition of its "Climate Day" in Morocco, in partnership with the **Ministry of Industry and Trade, the Ministry of Energy Transition and Sustainable Development of Morocco, and the Cluster ENR**. Initially scheduled for September 2023, the event was postponed due to the tragic earthquake in Morocco and will now take place **in Rabat on September 26, 2024**. This annual gathering continues the tradition of previous editions held in New York, Paris, and Stockholm.

This summit will bring together key players from the energy sector and ecosystem experts to raise awareness of climate challenges, share experiences, and propose concrete solutions for sustainable electrification. High-profile institutional figures will also be invited to speak.

Under the theme "**Sustainable Electrification for the Energy Transition: A Real Opportunity for Africa,**" this edition aims to strengthen the debate on climate issues in Africa. It will strive to place sustainable development at the heart of the continent's economic and social interests. By fostering investment opportunities in renewable energies, the event seeks to bring forth concrete solutions to support the energy transition. Nexans' Climate Day aspires to be a dynamic summit where ideas and initiatives converge for a significant impact on Africa's energy future.

"We are honoured to host the Climate Day in Morocco, a country that, under the visionary leadership of His Majesty King Mohammed VI, stands out for its remarkable efforts in accelerating the energy transition and promoting sustainable development. Morocco is an inspiring example for Africa and the world, demonstrating that economic growth can go hand in hand with the protection of our planet," said **Mrs. Selma Alami, General Manager of Nexans North & West Africa**.

Mr. Christopher Guérin, CEO of Nexans, added: "Morocco perfectly embodies the values of energy transition and sustainable development that we advocate, which is why we chose it as the host country of the 4th edition of our Climate Day. In a world facing ongoing crises and resource scarcity, companies have a crucial guiding role. We are therefore enthusiastic about bringing together decision-makers, experts, and renowned entrepreneurs at this event to contribute to accelerating the implementation of concrete solutions in Africa and beyond."

The event will also be an opportunity to reward the winners of the Nexans Climate Challenge, a competition designed to encourage climate innovation by recognizing the most promising projects in this field.

About Nexans

For over a century, Nexans has played a crucial role in the electrification of the planet. Today, it is committed to electrifying the future. With approximately 28 500 people in 41 countries, the Group is paving the way towards a new world of safe, sustainable and decarbonized electricity, accessible to everyone. In 2023, Nexans generated 6.5 billion euros in standard sales. The Group is a leader in the design and manufacture of cable systems and services across four main business areas: Power Generation & Transmission, Distribution, Usage and Industry & Solutions. Nexans was the first player in its industry to set up a Foundation supporting sustainable initiatives, bringing access to energy to disadvantaged communities worldwide. The Group is recognized on the CDP Climate Change A List as a global leader on climate action and has committed to Net-Zero emissions by 2050 aligned with the Science Based Targets initiative (SBTi).

Nexans. Electrify the future.

Nexans is listed on Euronext Paris, compartment A. For more information, visit www.nexans.com

About Nexans Morocco

A subsidiary of the Nexans Group since 1947, Nexans Morocco has established itself as a leader in the Moroccan electrical equipment market. It is also very active in the Maghreb and African markets.

Operating in the infrastructure, industry, and building markets, Nexans Morocco combines expertise and specialized skills in various fields, enabling it to implement a wide range of diversified products and turnkey solutions.

Nexans Morocco operates two production sites:

- The Casablanca site, which houses the units for electrical cells, transformers, and prefabricated substations;
- The Mohammedia site, entirely dedicated to electrical cables (power cables, building cables, telecommunication cables, and aeronautical cables).
